

SIID503

Schedule of Proposal Presentation on 28th November, 2018

13.00-16.20 at 304-305 Conference Room, 3rd flr, SiMR building

TIME	GROUP	TOPIC
13.00-13.25	B	Teratogenic effect of caffeine in chick embryos
13.25-13.50	G	The change of calcium metabolism in spontaneously hypertensive rats
13.50-14.15	I	Molecular detection of plasmid mediated mcr-1 gene in Enterobacteriaceae from Siriraj Hospital
14.15-14.40	L	Long term study of using Subischial socket in transfemoral amputee
14.40-15.05	M	The effect of foot orthosis on the walking and running efficiency.
15.05-15.30	E	Platform for Genetic Risk Prediction in Common Non-communicable Diseases
15.30-15.55	F	Automatic image detection of circulating tumor cells/ high gradient magnetic separation (CTC/HGMS) to detect malignant cells in ovarian tumor patients
15.55-16.20	N	A computational approach for an integrative analysis of human microbiome and metabolome data

Schedule of Proposal Presentation on 30th November, 2018

13.00-15.30 at 304-305 Conference Room, 3rd flr, SiMR building

TIME	GROUP	TOPIC
13.00-13.25	K	Tracking the effects of Moxidectin on Dengue Viral Replication in hepatocyte - like cells: a quest for a novel Dengue antiviral
13.25-13.50	H	Molecular epidemiology of Norovirus genogroup II among clinical isolates in Siriraj Hospital during 2016-2018
13.50-14.15	D	THE TERATOGENIC EFFECTS OF CELECOXIB TO THE DEVELOPING IN OVO CHICK EMBRYOS
14.15-14.40	C	The teratogenic effect of Indomethacin on the developing of chick embryo
14.40-15.05	J	Drug repurposing of melatonin as antiviral against dengue virus.
15.05-15.30	A	Classification of the digastric muscle variation in Thai population
